Greatario is awarded 2nd Composite Elevated Water Tower.

Scott Burn says “Greatario is very excited about being awarded their 2nd Composite Elevated Glass Fused-to-Steel Water tower for the Municipality of West Nipissing, Sturgeon Falls. It has made sense to build glass fused-to-steel tanks on the ground for the last 25 years, and now with tight maintenance budgets it is making sense to build glass fused-to-steel tanks on concrete pedestals and avoid long term repainting costs.”
