

Columbian TecTank Solutions for the Fire Protection Industry

For performance under fire, call Columbian TecTank.

Unrivaled experience: With over 100 years of history, Columbian TecTank is the firmly established leader in bolted and factory-welded steel tanks and silos. We have proven experience in designing solutions that meet your requirements. We understand that *speed and reliability count*. And you can count on Columbian TecTank to deliver.

- 150,000 tanks delivered in 125 countries around the world
- In-house experienced engineers
- Solutions designed to meet or exceed industry standards such as NFPA and FM
- Project managers work with you and your team from beginning to end to ensure our tank meets your specifications, works in the integrated system solution and is on time for installation

Highest quality: Our company brings a legacy of time-proven storage tanks in the field. Our tanks are completely coated inside and out with our electrostatically-applied modified powder epoxy under factory controlled conditions. The factory-applied and thermally-cured coating process eliminates the risks and costs of field applied coatings.

- We bring you the most specified bolted tanks in the world, preferred for our custom-engineered, third party certified, factory coated tank storage systems that have performed virtually maintenance free for decades
- Columbian TecTank offers a 15-year limited internal coating warranty on fire protection and potable water applications
- All products are manufactured in ISO 9001 certified facilities

Call (913) 621-3700 today to learn how you can have the best value in fire protection.

COLUMBIAN
TecTank
Proven Performance in
Tank Storage Solutions

Best value: Durable construction, superior coating and fast in-field erection means Columbian TecTank tanks offer lower initial and overall life cycle costs when compared to alternatives.

- Bolted tanks help you get the project open on time by shipping and installing in a shorter time frame
- Modular design allows fast and easy erection
- Fast erection reduces downtime of critical processes
- Tanks can be put into service in inclement weather due to the factory-applied coating
- Superior coating extends tank life and reduces life cycle maintenance costs
- Ability to disassemble and reassemble in the field enables facility expansion
