

TANKING UP

KEITH GOSSE/THE TELEGRAM

WATER STORAGE: The girders of the roof of a water storage tank sit on the ground as workers build a second tank nearby. The two tanks are being built for the Town of Conception Bay South at the end of Fowler's Road.

Each tank is being built from the top in five-foot sections. As each section is added, the tank is elevated for the addition of the next section. Each tank will be 70 feet high and will hold 2.9 million litres of water.
